**Subject: NaviNet® Care Gap Response Workflow Redesign**

**Summary:** AmeriHealth Caritas Louisiana and NantHealth | NaviNet are excited to announce the redesign of the workflow for the completion of Care Gap responses. This enhancement will allow providers to upload supplemental clinical documentation to close multiple Care Gaps.

Currently, supplemental clinical documentation to close Care Gaps can be uploaded to one member, one care gap at a time. The redesigned workflow will allow providers to resolve multiple Care Gaps in a specified group.

There are four major Care Gap groups included in this enhancement:

- Child and Adolescent Immunizations
- Care of Older Adults
- Transition of care
- Well care visits

Upon accessing the Care Gap Response Form, providers will notice that two new columns have been added at the beginning of the form:

- **Grouping Allowed?** – Indicates which Care Gaps can be grouped together.
  - *Rows can be grouped together for document upload/Care Gap closure if they share the **same color icon**, same **Care Gap Group Name**, and have a Provider Response Status of 'Response required'.*
- **Care Gap Group** – Indicates the name of the Care Gap/HEDIS measure.

Providers will be able to select multiple Care Gaps in a grouping, upload supporting documents, and resolve the Care Gaps in the group.

Providers will also be able to access a new Member Roster page via a link on the Care Gap Response Form, instead of going back to the Report Inquiry to pull a listing of all members with unresolved care gaps.

There will be no changes to the document types, upload size limits, or the ability to attach multiple documents.
