Reimbursement Policy ID: RPC.0065.2100

Recent review date: 10/2026

Reimbursement policies and their resulting edits are based on guidelines from established industry sources, such as the Centers for Medicare and Medicaid Services (CMS), the American Medical Association (AMA), state and federal regulatory agencies, and medical specialty professional societies. Reimbursement policies are intended as a general reference and do not constitute a contract or other guarantee of payment. The health plan may use reasonable discretion in interpreting and applying its policies to services provided in a particular case and may modify its policies at any time.

In making claim payment determinations, the health plan also uses coding terminology and methodologies based on accepted industry standards, including Current Procedural Terminology (CPT); the Healthcare Common Procedure Coding System (HCPCS); and the International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM), and other relevant sources. Other factors that may affect payment include medical record documentation, legislative or regulatory mandates, a provider's contract, a member's eligibility in receiving covered services, submission of clean claims, and other health plan policies, and other relevant factors. These factors may supplement, modify, or in some cases supersede reimbursement policies.

This reimbursement policy applies to all health care services billed on a CMS-1500 form or its electronic equivalent, or when billed on a UB-04 form or its electronic equivalent.

To the extent that any procedure and/or diagnosis codes are specified in this policy, such inclusion is provided for reference purposes only, may not be all inclusive, and is not intended to serve as billing instructions. Listing of a code in this policy does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by federal, state, or contractual requirements and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Guidelines may apply.

Policy Overview

This policy addresses both children and adult vaccines.

The Vaccines for Children (VFC) program was established in 1993 to serve children defined as "federally vaccine eligible" under section 1928(b)(2), which includes both "uninsured" and "Medicaid eligible" children. States receive federal funding for reduced-price vaccines under this program. All children under the age of 19 who are covered by Medicaid are considered eligible because of their Medicaid status.

Exceptions

N/A

Reimbursement Guidelines

The Vaccines for Children program includes vaccines which are used to prevent the diseases listed below:

Diphtheria	Mumps
Pertussis (whooping cough)	Hemophilus influenza type b
Pneumococcal disease	Hepatitis A
Poliomyelitis	Hepatitis B
Rotavirus	Human Papillomavirus
Rubella	Influenza
Tetanus	Measles
Varicella	Meningococcal disease
COVID- 19	Dengue
Respiratory syncytial virus	Monkey pox

Providers participating in the VFC program may be reimbursed for vaccine administration only. The SL (state-supplied vaccine) modifier is used when billing for these free vaccines through this program.

Immunizations for adults

Reimbursement to providers is available for both the vaccine and the administration components for the following:

Chickenpox (Varicella)	Mumps
Diphtheria	Whooping Cough (Pertussis)
Flu (influenza)	Pneumococcal disease
Hepatitis A	RSV
Hepatitis B	Rubella
Human Papillomavirus (HPV)	Shingles
Measles	Tetanus
Meningococcal disease	COVID-19
Hemophilus influenza type b	Monkey pox

If applicable, the billed vaccine administration must match the vaccine provided.
